

Castles Technology Worldline android S1F3 product announcement

Castles Technology launches the mobile S1F3 offering next android generation payment

The cutting edge payment device offers a full color touchscreen, secure android platform and high performance processor

Paris, 21 November, 2023 - [Castles Technology](#), the world's fourth payment solutions provider is pleased to announce the launch of the S1F3 a next generation mobile device that offers multifunctional capabilities and an optimized checkout process.

The S1F3 , based on Qualcomm's QCM2290 platform enabling reliable performance and power-conservation for energy efficiency in line with Castles Technology's sustainability goals, has upgraded features and memory support for low power consumption. The device comes with several features including 4G LTE/3G/2G, WLAN, Bluetooth, rear camera, front camera, and microphone. It is a robust device with a 98% reliability rate, that can handle the continuous use retailers see leading up to the end of year holidays.

Based on a secure Android platform it has integrated contactless reader function with a 5.5" full touchscreen.

The S1F3 is extremely easy, safe and secure for merchants looking for a next generation payment device. Other features that allow an enhanced client experience include:

Incredibly adaptable

- Optional barcode reader
- Accepts all payment types
- Flexible to integrate
- Business applications

Exceptional performance

- High Security Processor
- Operable under extreme conditions
- Secure Android architecture

Best possible security checks and certifications

- Paypass
- Paywave
- ExpressPay
- D-PAS
- J-Speedy and more

Castles Technology Worldline android SIF3 product announcement

With a proven track record spanning three decades, Castles Technology is committed to providing secure, reliable, and innovative payment solutions that empower businesses globally.

"The SIF3 brings the best of Castles Technology's Android payment technology at an affordable price point for smaller retailers. The device is secure, fast with a wide range of features. Working well under extreme conditions it can face any situation that is thrown at it, whether the intense sales period or outdoor festivals"

Jean-Philippe Niedergang, CCO / EMEA CEO of Castles Technology

Castles Technology is a leader in payment solutions, its differentiating factor being its unwavering dedication to customer satisfaction and exceptional flexibility. Additionally, Castles Technology's direct access to the semiconductor industry in Taiwan further reinforces its reputation for delivering high-quality, dependable products. The company proudly maintains complete ownership and control over its manufacturing facilities, ensuring the highest standards of quality and flexibility in product delivery.
